

their respective positions, said housing including a bridge interposed between said magnets and forming an opening for inserting an eyeglass temple piece; and
a magnetically saturable keeper plate.

¹
2 ~~26~~. The apparatus of claim ~~25~~, wherein said at least one rare earth magnet is made of neodymium.

¹
3 ~~27~~. The apparatus of claim ~~25~~, wherein said at least one rare earth magnet is nickel coated.

¹
4 ~~28~~. The apparatus of claim ~~25~~, wherein said magnetically saturable keeper plate is fabricated from Alnico.

¹
5 ~~29~~. The apparatus of claim ~~25~~, wherein the opening formed by said bridge is filled with deformable foam for securely holding eyeglasses when said apparatus is jostled.

C1
6 ~~30~~. A magnetic force eyeglass holder for releasable attachment to a garment, comprising:
two spaced-apart magnets;
a magnet housing for said magnets, said magnet housing fixing said magnets in their respective positions, said housing including a bridge interposed between said magnets and forming an opening for inserting an eyeglass temple piece; and
a magnetically saturable keeper plate.

⁶
7 ~~31~~. The apparatus of claim ~~30~~, wherein the opening formed by said bridge is filled with deformable foam for securely holding eyeglasses when said apparatus is jostled.
